

Choose one popular website:

1. Website Name

- YOUTUBE

2. Is it Responsive?

- Yes, YouTube is responsive and adapts to different devices.

3. What change on mobile?

- The structure doesn't stretch; it stays compact and stacked vertically. Navigation menus collapse into icons (hamburger menu, bottom tabs). Video thumbnails and titles adjust to fit smaller screens without distortion.

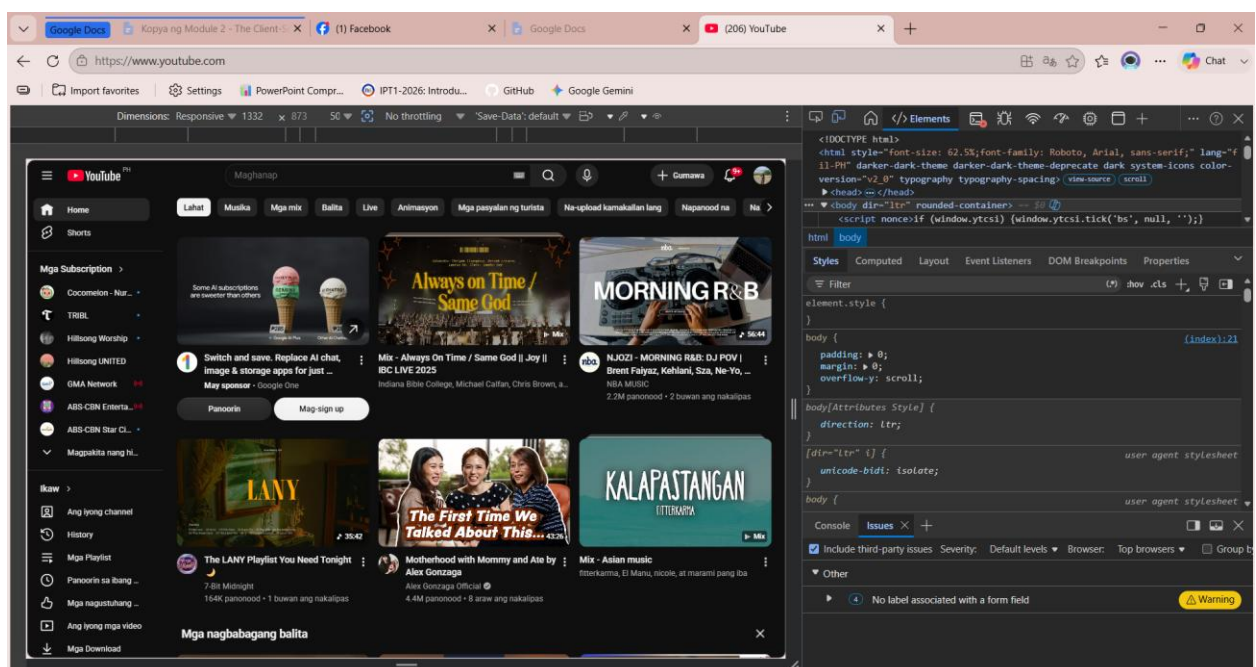

4. What change on desktop?

- The layout can stretch horizontally. As you resize the window, the structure changes—video thumbnails reorganize into multiple columns, sidebar expands, and more content fits on screen.

5. What do you like about the design?

- It's consistent across devices.
- Responsive behavior ensures usability whether on mobile or desktop.
- Familiar interface makes switching between devices seamless.

6. Screenshot desktop

7. Screenshot mobile
